Asian Journal of Civil Engineering

CISS.

The main objective of the Asian Journal of Civil Engineering (Building and Housing) is to provide a background for scientific and technical progressive achievements in the field of civil engineering with an emphasis on building and housing disciplines. It comprises relevant research papers and original articles. The Asian Journal of Civil Engineering (Building and Housing) welcomes articles and research contributions not published elsewhere on topics such as:- Building materials and concrete technology;

- Earthquake and structural engineering;
- Construction engineering;
- Energy conservation and environmental design;
- Housing policy and planning.

Although the journal will publish authoritative papers on theoretical and experimental research works and advanced applications, it may also feature, when appropriate:

- a) tutorial survey type papers reviewing some fields of civil engineering;
- b) short communications and research notes;
- c) some pages are devoted to the book reviews and conference announcements.

This Journal is accredited by the Iranian Ministry of Science, Research and Technology as Scientific-Research Journal, Licence No. 3/2910/1142
