9TH AICIF 2021 WELCOMING REMARKS

FEBI UIN SUNAN KALIJAGA YOGYAKARTA, *INDONESIA*

It is an honour for me to welcome all the keynote speakers, invited panellists, and participants of the 9th ASEAN Universities International Conference on Islamic Finance (AICIF) 2021. The theme of our 9th AICIF 2021 is “*Strengthening Islamic Economy and Halal Industry towards Economic Recovery and Sustainable Development in the Amidst Pandemic Era*”.

As the host of this conference, FEBI UIN Sunan Kalijaga is very honoured to provide a stage for Islamic economists from various countries of the world. This event is expected to increase our understanding of Islamic financial literacy and improve the diversity of research development on this subject.

So far, FEBI UIN Sunan Kalijaga has contributed to produce competitive graduates who are superior and prominent in the field of Islamic economic and business development. It is believed that this sector in the future will have a significant contribution in bringing Indonesia into a developed country, respected by the world, and a home for the growth of people's welfare.

Even though we are currently still in the recovery period due to the covid-19 pandemic, it does not dampen our enthusiasm to ensure that the 9th AICIF will runs extraordinary. Both the offline agenda that we carried out at the Ambarrukmo Hotel or the participants who took part in our virtual meeting platform. Therefore, I personally congratulate you on participating in this conference, hopefully it can provide as much benefit as possible to the participants and the community in general.

Regards,

Dr. AFDAWAIZA, S.Ag., M.Ag.
Dean, Faculty of Islamic Economics and Business

9TH AICIF 2021
WELCOMING REMARKS
UNIVERSITI ISLAM SULTAN SHARIF ALI
BRUNEI DARUSSALAM

First of all, it is my pleasure to welcome you to the 9th ASEAN Universities International Conference on Islamic Finance (9th AICIF) and extend our deepest gratitude to Sunan Kalijaga State Islamic University, Yogyakarta, Indonesia for hosting this year's 9th AICIF held on 17th to 19th November 2021.

This annual conference has come a long way since 2013 and has surpassed the various challenges and dimensions of discussion that Islamic Finance has faced over the years and has adapted to the changing technological trends in the industry. The unique way this conference is handled annually is by the selection of different institution or university to be the host and this year, we are delighted to have UIN Sunan Kalijaga as the host for this auspicious event. We also realised that this annual conference served as an important platform with researchers and professionals coming in from this part of South-East Asian region who will contribute to the discussions to move towards understanding the broader scope of Islamic Finance.

The theme of this year's conference is "Strengthening Islamic Economy and Halal Industry towards Economic Recovery and Sustainable Development in the Amidst Pandemic Era". We have experts from across the field who will be sharing their latest research findings, thoughts, knowledge, opinions, and contributions with the rest of us, both physically and virtually.

I sincerely hoped that this conference will continue to play its role as an important platform for all stakeholders to meet and addressed issues related to Islamic Finance especially in this era of COVID-19 where Islamic Finance industries have also been affected on a global scale the past year. I also hope that this conference will be able to help in promoting and strengthening the networking and collaboration between researchers, academicians, and professionals.

On behalf of UNISSA, I would like to extend my sincerest appreciation to the Main Organiser, Co-Organisers, sponsors and many thanks to everyone involved in organising such a successful and wonderful conference. To all participants and presenters attending this year's AICIF, both physically and virtually, I hope you will be able to benefit greatly from this conference and take part in strengthening the role of Islamic Finance so that it can contribute to a more sustainable and well-balanced economic growth in the society.

Sincerely,

Dr. ABDUL NASIR BIN HAJI ABDUL RANI

Dean, Faculty of Islamic Economics and Finance

Universiti Islam Sultan Sharif Ali

9TH AICIF 2021
WELCOMING REMARKS
INTERNATIONAL ISLAMIC UNIVERSITY
MALAYSIA

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

السلام عليكم ورحمة الله وبركاته

First and foremost, I am very honoured and would like to congratulate the main organizer of 9th AICIF 2021 - UIN Sunan Kalijaga on their success in leading and organizing this conference at the ASEAN level. I would also like to thank the ASEAN University partners as co-organizers who continue to support and ensure the sustainability of AICIF as one of the major regional Islamic Finance conferences. With the support, agreement and commitment of the seven University partners, AICIF can continue to run for the ninth time in 2021, starting from the 1st AICIF in 2013.

Compared to AICIF 8th where the economy is suffering from the effects of the pandemic, AICIF 9th (2021) is held at the time where the recovery period of the economic phase has been felt. The economy has gradually recovered despite the slow effects of the pandemic beginning in 2020. Following on from that, 9th AICIF themed "**Strengthening Islamic Economy and Halal Industry Towards Economic Recovery and Sustainable Development Amidst the Pandemic**", is a very appropriate theme in line with the process of economic recovery. Islamic Finance along with the halal industry is expected to play a major role in reviving the economy both in the macro and micro sectors after the pandemic.

Everyone is aware that the pandemic has exacerbated poverty. The pandemic has also had a tremendous impact on small traders and MSMEs in terms of operations, disrupting the supply chain as well. Pandemic poses challenges for liquidity, resilience and capital for the Islamic banking sector, the largest component of the Islamic financial industry. Therefore, effective strategies are needed for achieving a sustainable recovery for each of the sectors involved.

Nonetheless Islamic Finance as part of the global financial system, has shown resilience throughout the pandemic period and significantly contributed to the new normal. Not only at the level of the banking sector where loan deferment programs have been

implemented to borrowers, non-banks also especially Zakat Institutions have played an important role in helping the communities most affected by the pandemic. Continuing from this, Islamic Finance can help further in filling the financing gap required to kickstart the post-pandemic economic recovery.

In every crisis there is an opportunity. Pandemics are teaching people to be more mature, so is Islamic Finance. Several remedial measures are needed to further strengthen Islamic Finance in the face of any future crisis. This includes a clear need to look at the challenges of liquidity management for Islamic banks, especially in the wake of loan deferment programs in place for various jurisdictions offering Islamic Finance, improving coordination and integration among the Islamic Social Finance instruments (Zakat, Sadaqah, Waqf, Takaful), higher participation of Fintech companies from the financial inclusion perspective, as these companies often work with microenterprises and fringe borrowers with a minimal financial record from informal sectors. Islamic financial services industry can benefit by developing artificial intelligence (AI) and big data-led infrastructure to support full spectrum of services starting from the distribution of assistance to community and evaluating and monitoring financing.

I believe this conference will discuss the consolidation of Islamic Finance for the foreseeable future in line with the post-pandemic economic recovery. The presence of keynote speakers will also bring greater enlightenment to the participants and all stakeholders.

Finally, the IIUM Institute of Islamic Banking and Finance looks forward to more collaborative efforts of this nature among academic and industry practitioners of Islamic Finance.

It is hoped that the Conference goes smoothly and achieves its goal.

Thank you.

Professor Dr. RUSNI HASSAN

Dean, IIUM Institute of Islamic Banking and Finance
Malaysia

**9TH AICIF 2021
WELCOMING REMARKS
UNIVERSITAS DARUSSALAM GONTOR
INDONESIA**

Assalamu'alaikum warahmatullahi wabarakaatuh

First, we would like to wish to congratulate UIN Sungan Kalijaga for organising the 9th ASEAN Universities International Conference on Islamic Finance (AICIF) 2021 which we believe would be inspiring and enlightening. It is a great honour for us to be co-host of the conference in this year.

The timing of this conference is still during pandemic mode which affect certainly a decrease in global economic condition. The theme of the conference, “Strengthening Islamic economy & Halal Industry towards economic recovery and sustainable development amidst the pandemic” outline the potential of Islamic economy & halal industry to facilitate the recovery of the global economy.

Based on this, it would be extremely necessary supported by education and research related to Islamic economy and halal industry to increase the welfare of the Ummah. Hopefully this conference will be one of the efforts in providing enlightenment and insight related to Islamic economics continues to grow worldwide and provide benefits and prosperity for all mankind as well as the entire universe (*Rahmatan lil Alamin*). Therefore, we all have a duty and responsibility to develop education and research related to Islamic economics and halal industry. Let us pray to Allah SWT for asking His assistance and guidance to carry out these duties and responsibilities together.

Finally, we extend our gratitude to the organizing committee for their endeavours for making this event a success and we wish everyone a pleasant and productive conference. Thank you

Wa'alaikumsalam warahmatullahi wabarakaatuh

**9TH AICIF 2021
WELCOMING REMARKS
UNIVERSITAS ISLAM SULTAN AGUNG
INDONESIA**

Assalamu'alaikum warahmatullahi wabarakaatuh

Alhamdulillah, all praises and gratitude always uttered to God Almighty, Allah SWT. Salawat and salam be with our prophet Muhammad SAW.

The warm welcome and felicitations specially to State Islamic University Sunan Kalijaga Yogyakarta on hosting the 9th Asian Conference on Islamic Finance (AICIF) 2021. Also, I would have to mention a high appreciation to the co-organizer and sponsors for enthusiastic support in the success of this annual agenda.

“Strengthening Islamic Economy and Halal Industry toward Economic Recovery and Sustainable Development in the Amidst Pandemic Era” as the Conference theme is a highly pressing issue today. Many parties are misguided in exploring solutions to welfare problems that are increasingly chaotic. Belief in liberal mechanisms in fact, does not provide justice equally. It is not too late for us to return to the nature of the sharia system in our life. Responding to the needs of recovery in the new normal era, we need to uphold empathy and help each other. In contrast to the conventional concept that prioritizes the interests of a group, the Islamic economic system is very concerned with justice. Transactions based on trust and honesty are the buds of a culture of mutual welfare for others, not just enriching oneself.

The good news is that the Islamic economy in Indonesia and various countries in the world is now increasingly being supported. One of them is by increasing interest in the halal industry which has penetrated various sectors of goods and services. This needs immediate follow-up. The large potential of the Muslim population needs to be directed to be better prepared to seize opportunities to develop a halal industry that can meet the needs of the global market.

Thus, I am sure that with the collaboration of experts, researchers, academics and practitioners in this 9th AICIF, various ideas in strengthening Islamic Economy will emerge. This will be a means for us to make the best contribution in the revival of an economy that is rahmatan lil alamin.

May Allah bless us and ease our efforts in building a better civilization. Thank you.

W'a'alaikumsalam warahmatullahi wabarakaatuh

Sincerity

Prof. OLIVIA FACHRUNNISA, Ph.D

Dean of Faculty of Economics,
UNISSULA, Indonesia

**9TH AICIF 2021
WELCOMING REMARKS
INSTITUT TAZKIA
INDONESIA**

Assalamu'alaikum warahmatullahi wabarakaatuh

It is a privilege for Tazkia University College of Islamic Economics to be co-hosted at the 9th ASEAN Universities International Conference on Islamic Finance that held on November 17th – 19th 2021 at FEBI UIN Sunan Kalijaga Yogyakarta. Tazkia University College of Islamic Economics is a pioneer of the development of Islamic economics and finance in Indonesia. Our joining in this event was a manifestation of our vision to become a world class university in 2025.

Tazkia University College of Islamic Economics has contributed to the development of Islamic Economics and Finance in Indonesia in the last 2 decades. We helped convert the 25 banks and conventional insurance to full-fledged Islamic Banking. Besides that, Tazkia University College of Islamic Economics also empowers the grassroot by creating "Tazkia Islamic Village" located in Babakan Madang, Bogor Regency.

In the future, our joining in AICIF will contribute to strengthening Islamic Economic & Financial resilience in ASEAN through collaborative research, so that research is appropriate and supports the advancement of science in ASEAN moreover in the World. We congratulate FEBI UIN Sunan Kalijaga as a Host from this conference and wish for the smooth running of this event so that the 9th AICIF theme is *"Strengthening Islamic Economy and Halal Industry towards Economic Recovery and Sustainable Development in the Amidst Pandemic Era"* can be achieved together.

Best Regards,

Dr. MURNIATI MUKHLISIN M.Acc.
Rector of Institut Tazkia

**9TH AICIF 2021
WELCOMING REMARKS
MINDANAO STATE UNIVERSITY
*PHILLIPINES***

Assalamu Alaykom Warahmatullahi Wa Barakato.

My heartfelt congratulations to the organizers or people behind the 9th ASEAN International Conference on Islamic Finance (AICIF). People see only the finished product and are not likely to have an idea of the enormous behind-the-scenes work that preparations for a grand activity like this entails.

The conference theme “*Strengthening Islamic Economy and Halal Industry towards Economic Recovery and Sustainable Development in the Amidst Pandemic Era*”. cannot be timelier and auspicious. Hurling into a future of prodigious and rapid change, the Islamic world should take stock and determine how we are holding up, coping, and keeping apace with the challenges of a global industry revolution. Although Islamic Finance is anchored on principles and core values enshrined in the Holy Qur’an and the Sunnah, which are practically etched in stone, we recognize the fact that failure to adapt to present realities stands to leave us stranded and marooned on the shore, or lagging behind while the rest of the world eagerly sets sails or takes great strides in the march of progress.

On the other hand, the taking of stock seems crucial to ascertain how faithful we have been to the philosophical underpinnings of Islamic Finance, which means we go back to the primary sources. Much as we wish for seamless transitions or smooth passages from where we stand now to a global industry, for example, these do not come easy.

In fact, there are issues and gray areas that I hope will be taken up in this Conference like the enforcement of zakah and how, and how it can help in alleviating poverty, the questions of profit, competition and control in business, and the line between halal and haram in investment (when does a halal investment become haram?).

It is my hope, too, that the Conference will be more productive of answers than of questions, and the discourses of the speakers bring greater enlightenment to the participants and all stakeholders. Finally, the Mindanao State University looks forward to more collaborative efforts of this kind. Meaningful high-level discourse expected to ignite sparks can generate critical ideas for a more stable Islamic Finance and greater economic development.

My best wishes for the success of the Conference.

HABIB W. MACAAYONG
DPA President MSU System

Abstract

This paper aims to examine the effect of knowledge sharing capability and product innovation on business performance with environmental dynamism as moderating variable. Respondents of this study were 148 Muslim owners or leaders of fashion SMEs in Semarang, Indonesia. A hierarchical regression analysis was used to examine the relationship between knowledge sharing capability and product innovation on business performance with environmental dynamism as moderating variable. This study found that knowledge sharing capability have a significant effect on product innovation and business performance. Furthermore, product innovation has a significant effect on business performance and environmental dynamism can be a mediator of the relationship between product innovation on business performance.

Keywords: Knowledge sharing capability, Product innovation, Environmental dynamism, Business performance

Introduction

Knowledge sharing capability has a significant contribution to the development of innovation and competitive advantage for companies (Azadehdel et al., 2013) and being a driver of human resources to carry out innovation (Lin, 2007; Rahab, 2011). Knowledge sharing can be developed through formal and informal mechanisms to ensure knowledge sharing activities in various fields through easy access to data and information, sharing of experiences and knowledge. Knowledge sharing is related to accessing information between employees by giving and receiving voluntarily, which is considered capable of being a driver for increasing innovation capability.

A person's motivation has an essential role in sharing knowledge within the organization, so that trust and cooperation are determinants of the success of knowledge sharing in organizations (Javadi et al., 2012; Kishore et al., 2015). Effective knowledge sharing will enable the transfer of knowledge among employees and reduce the negative impact among employees so that affective knowledge sharing can create cost efficiency, company growth, and improve innovation performance (Abdelwhab Ali et al., 2019). Furthermore, innovation performance will determine organizational performance (Antonio Davila et al., 2018; Da Costa et al., 2018).

Environmental conditions change rapidly and significantly affect the success of management when making decisions (Fiedler, 1964) so that various innovations are carried out when facing environmental changes to survive in the market (Drucker, 1985). The role of

product innovation becomes important when facing dynamic environmental changes in order to be able to provide new products according to customer expectations and have the potential to improve business performance (Tajeddini, 2016).

Studies of the relationship between knowledge sharing and business performance are still contradictory. This happens because they do not understand the behavior of the relationship between these variables. Previous studies have shown that knowledge sharing is a determinant of business performance (Uluwafemy et al., 2016; Wahyu et al., 2016). Furthermore, tacit knowledge sharing can improve company performance (Rohana Ngah & Ibrahim, 2009). Knowledge donating and knowledge collecting significantly affect company performance both in finance and operations (Son & Phong, 2020). Another study shows that explicit knowledge sharing cannot improve operational performance (Wang & Wang, 2012; 2014). In this study, the researcher places product innovation to solve the differences in the results of previous research. The research results are expected to contribute to the development of knowledge and solve problems faced by Muslim fashion SMEs to improve business performance.

Literature Review and Hypothesis Development

Knowledge sharing capability and product innovation

Knowledge sharing is the foundation for sharing knowledge among employees, and also for contributing to the implementation of knowledge and innovation. Knowledge sharing through sharing data, information, and knowledge among employees will significantly affect innovation capability (Luciana Andrawina et al., 2008; Man Fung Lo, 2018; Muafi, 2020). Explicit and tacit knowledge sharing is considered capable of improving the quality of innovation and speed of innovation (Wang & Wang, 2012b). Effective knowledge sharing practices can improve innovation performance through cost efficiency and company growth (Abdelwhab Ali et al., 2019). Besides, knowledge sharing affects innovation performance (Paavo et al., 2015) and strongly relates to innovation capability (Kumar & Rose, 2012). Therefore, the proposed hypothesis is as follows:

H1: Product innovation is influenced by knowledge sharing capability.

Knowledge sharing capability and business performance

Knowledge sharing allows organizations to transfer knowledge from experts to other employees so that organizations can capture knowledge and reduce negative impacts that will occur. SMEs that can utilize tacit knowledge sharing among employees will be more creative and innovative to improve company performance (Ngah & Ibrahim, 2011). Studies show that knowledge sharing significantly affects organizational performance (Wahyu et al., 2016; Kucharska, W. and Erickson, 2019; Muafi, 2020). Knowledge-sharing capability significantly affects organizational growth and creates cost efficiency (Abdelwhab Ali et al., 2019). Furthermore, knowledge-sharing culture also has a significant effect on company performance (Marouf, 2007). The facts show that knowledge donating and knowledge collecting have a strong relationship with organizational performance (Kim et al., 2013). Therefore, the proposed hypothesis is as follows:

H2: Business performance is influenced by knowledge sharing capability

Product innovation and business performance

Studies show that innovation performance is a determinant of organizational performance (Antonio Davila et al., 2018; da Costa et al., 2018). Product innovation capability can improve business performance (Wahyu et al., 2016). Likewise, the speed and quality of innovation can improve financial performance and operational performance (Wang & Wang, 2012a). The interaction between product and service innovation models will benefit long-term business performance (Visnjic, et al, 2014). Innovation capability has a vital role in improving business performance (Alam, 2013). Product innovation can improve business performance (Tajeddini, 2016). Therefore, the proposed hypothesis as follows:

H3: Business performance is influenced by product innovation

Environmental dynamism as moderating variable

The heterogeneous consumer choices encourage companies to adapt to changing markets and increasingly dynamic technologies (Atuahene-gima & Ko, 2001). This condition requires the speed of innovation to adapt to changes in technology and competition (Kayhan Tajeddini, 2008). The success of an organization's management when making decisions to achieve goals depends on environmental conditions (Fiedler, 1964). The facts show that product innovation has an essential role in creating competitive advantage and business performance (Akamavi, 2005; Lages et al., 2008). When facing a dynamic environment, companies that want to be successful must share innovations to grow fast and survive in the market (Drucker, 1985). Companies facing a dynamic environment are required to innovate products that meet customer expectations to improve business performance (Tajeddini, 2016). Therefore, the proposed hypothesis is as follows:

H4: Environmental dynamism moderates the relationship between product innovation and business performance

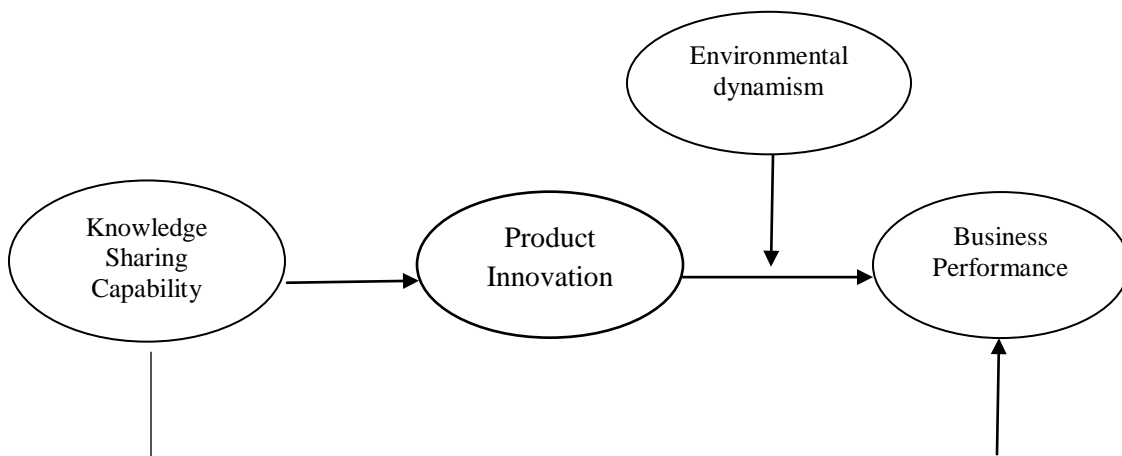

Figure 1: Conceptual Model

Research method

Sample and data collection

Small and medium enterprises in the Muslim fashion sector are becoming the objects of this research. The research location is in Semarang, Central Java, Indonesia, with a total of 148 respondents. Data was collected by distributing 220 questionnaires, but only 148 respondents (67.27%) returned and analyzed. The description of the respondents in general consists of men (24.50%) and women (75.50%) with ages between 19 to 57 years and experience managing a business since 2 to 26 years.

Measurement

Primary data in this study is collected through surveys, and respondents' answers were measured by using a rating scale of 1 – 10 (Hair et al, 2010), with the lowest score (1) and the highest (10). Research variables are measured through indicators adopted from some literatures. The knowledge sharing capability variable is measured through four indicators adopted from (Raed Kanaan & Masa'deh, 2013), which are; the desire to share knowledge voluntarily, being willing to share knowledge with colleagues who need it, being open to suggestions related to knowledge from colleagues, and having a high level of expertise. Product innovation variable is measured through five indicators adopted from the perspective of (Muhammad Shakeel, 2014), including product novelty and uniqueness, new products according to customer needs, frequency of new product introductions, product contribution to market expansion, and products providing the best value for customers. The environmental dynamism variable is measured through indicators adopted from (Muhammad Shakeel, 2014), namely changes in customer needs, changes in strategy to deal with competitors, the rate at which products become obsolete, and changes in technology. Business performance is measured through four indicators adopted from (Nuryakin et al., 2018) (Nuryakin et al., 2018; Yang et al., 2011), namely growth in the number of customers, profit growth, sales volume growth, and sales area growth.

Data Analysis and Measurement Model

The research data is processed using SPSS 23 to facilitate hypothesis testing. The results of the classical assumption test show that the data is feasible to be analyzed using multiple linear regression, this can be proven from the Kolmogorov Smirnov test value of > 0.05 , meaning that the data distribution is close to normal and no multicollinearity ($VIF < 10$); and Glejser test results show p-value of > 0.05 , meaning that there is no heteroscedasticity. Table 1 shows the validity test results with a p-value of < 0.05 so that all indicators of the research variables are also declared valid, and the Cronbach Alfa value of > 0.06 shows reliable.

Table 1. Results of Data Validity and Reliability

Variables and indicators	p-value	Cronbach Alfa
Knowledge sharing capability		0.825
Willingness to share knowledge voluntarily.	0.00	
Willing to share knowledge with colleagues who need it.	0.00	
Be open to suggestions regarding knowledge from colleagues	0.00	
Have a higher level of work expertise	0.00	
Product innovation		0.832
The novelty and uniqueness of the product	0.00	
New products according to customer requirements	0.00	
Frequency of new product introduction	0.00	
Product contribution to market expansion	0.00	
Products provide the best value for customers	0.00	
Environmental dynamism		0.830
Changes in customer needs	0.00	
Changes in strategy to face competitors	0.00	
The rate at which the product becomes obsolete	0.00	
Technological change rate		
Business performance		0.872
Growth in the number of customers	0.00	
Profit growth	0.00	
Sales volume growth	0.00	
Sales area growth	0.00	

Results

The relationship between knowledge sharing capability, product innovation, and business performance is developed to facilitate hypothesis testing. Table 2 shows the effect of knowledge sharing capability on product innovation (std = 0.42 with p-value $0.00 < 0.05$), then the effect of knowledge sharing capability on business performance (std = 0.43 with p-value $0.00 < 0.05$) so that H1, H2 are accepted. The effect of product innovation on business performance shows (std = 0.35 with p-value $0.00 < 0.05$), so H3 is accepted. The results of the moderation test show that environmental dynamism moderates the relationship between product innovation and business performance, as evidenced by the moderating regression coefficient (std = 0.24 with p-value $0.04 < 0.05$) so that H4 is accepted.

Table 2. Hierarchical regression on moderating role environmental dynamism on the product innovation and business performance

Independent variable	Regression Model 1	Regression Model 2
	Product Innovation	Business Performance
Knowledge Sharing Capability	0.42*	0.43*
Product Innovation		0,35*
Environmental Dynamism * Product Innovation		0.24**
R Square	0.14	0.36
Adjusted R Square	0.13	0.35
F-value	0.00	0.00

Note: * sig < 0.01; ** sig < 0.05

Discussion

Knowledge sharing capability affects product innovation. The desire to voluntarily share knowledge and be willing to share knowledge with colleagues will encourage the creation of information and knowledge sharing and impact the growth of enthusiasm for new product innovations. Likewise, the openness to receive suggestions from colleagues and their expertise also encourage enthusiasm for product innovation. The results of this study are in line with the findings which state that knowledge sharing affects innovation performance (Paavo et al., 2015). The study is also in line with the findings that knowledge sharing strongly relates to innovation capability (Kumar & Rose, 2012).

Knowledge sharing capability has a significant effect on business performance. Awareness and willingness to share knowledge voluntarily with colleagues in need will transfer new knowledge and information. Voluntary knowledge transfer among co-workers to meet customer needs and desires will impact increasing sales and company performance. The openness of colleagues to share knowledge will encourage enthusiasm to meet customer needs and desires and impact business performance. The results of this study are in line with the findings that knowledge sharing has a significant effect on organizational performance (Wahyu et al., 2016; Kucharska, W. and Erickson, 2019; Muafi, 2020). Knowledge sharing capability can create cost efficiency and organizational growth (Abdelwhab Ali et al., 2019).

Product innovation affects business performance. The ability of SMEs to create unique and appropriate to the customer needs will be able to encourage increased sales. Likewise, the speed of introduction of new products according to market needs will be able to expand the market, increasing sales and impacting business performance. These results align with research findings that innovation performance is a determinant of organizational performance (Antonio Davila et al., 2018; da Costa et al., 2018). In addition, product innovation capability can improve business performance (Wahyu et al., 2016). Thus, environmental dynamism can mediate the relationship between knowledge sharing capability and business performance.

The ability of SMEs to innovate new products that are unique and different from competitors according to customer needs is essential in facing changes in the business environment. New product innovations supported by the ability to adapt to changes in the environment will encourage increased business performance. The results of this study are in line with the finding that in the face of a dynamic environment, one must share innovations to grow fast and survive in the market (Drucker, 1985). Companies facing a dynamic environment are required to innovate products that meet customer expectations to improve business performance (Tajeddini, 2016).

Conclusion

New product innovations that are unique and different from competitors are needed by SMEs when facing changes in the business environment. The success of product innovation requires support for effective knowledge sharing among colleagues. Likewise, improving business performance can be increased when SMEs can innovate new products according to market needs. New product innovations that can follow the dynamics of the environment, such as according to customer needs, replacing obsolete products, and adapting technology, will improve business performance. This research was conducted with the object of Muslim fashion with a limited area in Semarang, Central Java, so that that future research can be carried out in a broader object.
