Cancer is a malignant neoplasm disease that has very broad and complex spectrum. The disease ranging from the most malignant neoplasms benign to the most vicious malignant neoplasm. Number of patients with this disease is increasing all the time. Literatures obtained from several studies, which were reviewed research is qualitative research. The method varies from experience, observation, and others. The results obtained indicate that most respondents expressed feelings of discomfort, distress, shock, sadness and grief. Likewise with their partner, felt a very heavy pressure. This disease affects various patterns in the life span of husband and wife, both formal and informal activities. Adjustment in couples is a continuing process in line with one's life. Discuss experience of cancer is often said that as a partner is a key that can help patients be successful in treatment or in adapting to illness.

Keywords: *husband, partner, cervical cancer, adaptation*
